

Certificate of authenticity

Stone-Veneer is a veneer with a real stone surface.

A thin stone layer is split off from solid stone plates by means of a GRP layer (glass fibre reinforced plastic). The natural, rough-split surface results from this process.

Stone-Veneer has a total thickness of approx. 1.5 mm, the GRP layer of approx. 1.0 mm, the stone layer of approx. 0.5 mm.

The raw stone surface is protected against dirt.

Origin and stone types

Stone veneers can only be produced from stones like slate and quartzite which can be splitted.

We use color slates and quartzite stones from Indian stone quarries.

The slate and stone structures have been formed more than 200 millions of years ago.

Guaranty of authenticity

We guarantee that the surfaces of "Stone-Veneer" are made of real stone.

The stone surfaces are only split off from natural, solid stone slabs.

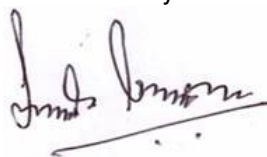

The natural rough-split surfaces reflect the characteristics of the stone structures of millions of years.

Each sheet is unique.

Warranty of 7 years

We guarantee that the splitted stone layers of Stone-Veneer are non-detachably connected with the GRP layer. We also guarantee that the stone layer of only a tenth of a millimeter will not dissolve, split of or wear away without mechanic influence.

This warranty is valid for interior use.
